CLARITY

EYEWEAR

*The Clear choice
in Eye Fashion*

More is better with our AirMag II Clip-on collection. This collection gives you everything you see from the AirMag I Clip-on collection plus an extra clip-on with either an anti-blue light, nighttime, or a dual anti-blue light/nighttime clip-on that offers the maximum eye protection.

Crisp good looks, advanced materials and lasting quality at a very affordable price is the perfect way to sum up our Smart and Star collections, the #1 choice for value frames.

Comparable to other well-known brands, this large collection of men's & ladies styles features the extra-flexible memory-titanium material in the bridges and/or in the temples. These lightweight frames offer both fashion and function all in one.

This feminine collection incorporates the same materials and construction of the Konishi 100% Titanium collection. The styling is inspired by European fashion with an objective of being sophisticated, yet simple and elegant.

High durability, a comfortable fit and a superior design is everything you get with our AirMag I Clip-on collection. The included polarized magnetic sun clip-on makes it conveniently easy to switch from indoor to outdoor. The lenses in each magnetic sun clip-on enhance contrast and reduce sun glare.

KONISHI

TOTAL TITANIUM

This collection represents the absolute cutting-edge engineering and metal material in the industry. Every major component of these frames is either pure or beta-titanium delivering the best performance for the patient, including nickel-allergy free.

Utilizing the highest industry standards of technology, materials, and construction, our Konishi Acetate collection delivers a large variety of colorful, contemporary styles at extremely competitive prices.

Monalisa Eyewear combines the latest and freshest designer fashion frame styles, merging sophistication and elegance with optimal vision functionality.
