## EXPERIENCE VIRTUAL TRY-ON

Our technology has been rigorously developed, tested, and applied to achieve one of the most accurate digital fitting experiences in the Optical Industry. All that's left for you is to try it on.

Our 3D virtual try-on images are rendered from the original CAD drawings and paired perfectly with Apple face recognition software to perfectly scale the frame to your face.

## TRY-ON THIS STYLE

With the face ID technology on your iPhone or iPad (iPhone 10 or later), you're able to experience our try-on feature.
